

# MODERN FLOORING CHOICES PRESENTATION

Polished concrete and epoxy coatings can produce some of the most durable finished floors. But is it right for your project?

Join us for a one-hour AIA-accredited Lunch and Learn presentation with DANCER to explore:

- The process of polished concrete floors and various epoxy floor coatings.
- How to budget for a variety of finishes and design considerations.
- How workflow processes through DANCER to ensure end clients get BEST WORK.
- Long-term use and maintenance for polished concrete and epoxy floors.

After a 45-minute presentation and 15-minute Q&A, participants will be able to:

- Describe the sealing and polishing process for polished concrete finishes.
- Identify BEST WORK when assessing the finished installation of polished concrete and epoxy coating installations.
- Explain the differences when polished concrete and epoxy coatings are best specified for each type of space.
- Discuss the long-term cost savings of polished concrete and epoxy floors compared to other floor materials.

Presented by Nick Dancer, founder and president of DANCER in Fort Wayne, Indiana. DANCER is a basis-of-design installer of terrazzo, polished concrete, and coatings in the Midwest and a global manufacturer and installer of terrazzo precast for signature construction projects.
